

I fully support all five counties returning to Eastern Time. I strongly believe the original vote would have been different if each county knew how the other would vote. This split causes great problems for one of the largest economic engines in southern Indiana, NSWC Crane. Having the largest portion of the workforce work and live in different time zones is very difficult to handle especially for those raising children. Almost everyone working in this area has a long commute causing issues with day care. Also, our school children are suffering as many of the extracurricular activities involve crossing timezones. This causes children to be out later on school nights. Please reconsider everyone being on eastern time.
